

Simpcw Resources Group in the Environment Industry

Our Environmental Division is committed to protecting and enhancing the natural environment within Simpcw Territory. By embracing the Secwépemc “Walking on Two Legs” philosophy, we collectively integrate both Western science and Secwépemc knowledge in our environmental stewardship, planning and governance.

How We Work

Our dedicated team ensures all projects adhere to the highest environmental standards, fostering sustainability, and ecological health for future generations.

Integrated Knowledge

Combining Secwépemc knowledge with industry leading environmental management practices, we deliver comprehensive solutions.

Sustainable Practices

Leveraging responsible resource management and innovation, we prioritize long-term environmental health.

Regulatory Excellence

Through audits and monitoring, we ensure environmental compliance while upholding high industry and cultural standards.

Collaborative Approach

We deliver integrated environmental solutions through cross-sector partnerships and community collaboration.

Our Impacts

Join us in making a difference. Explore how Simpcw Resources Group’s Environmental Division can help your projects contribute to a more sustainable and equitable future.

20+

Land restoration projects in collaboration with federal and provincial governments, focusing on rehabilitating degraded forest areas.

15+

Strategic partnerships to advance our sustainable forestry and conservation efforts.

20%

Increase in indigenous employment in our forestry and environmental projects from 2019 to 2023.
